§ 01 PROFILE

Full-stack TypeScript engineer with four years shipping production web & mobile systems for US logistics, HR and fintech operators. Comfortable owning a feature end-to-end – frontend, backend, infrastructure and deploy – with agentic AI woven into the day-to-day: I build the tooling, run self-hosted inference, and agents handle the typing while I drive architecture, review and integration.

§ 03 EXPERIENCE

ETL GROUP LLC

May 2024 – Present

Full-stack Software Engineer · Remote – US logistics

Lead / sole developer across a suite of products for US freight carriers and dispatchers.

- ClaraHR – AI-powered driver onboarding system which contacts, onboards and files US truck drivers in the carrier's system with minimal HR involvement. Lead the project end-to-end, including infra and B2B communication. Onboarded 800+ drivers across 8 enterprise clients.
- CargoHub – freight marketplace where shippers & brokers browse trucks, post loads and book capacity, with an AI assistant handling routine dispatch. Sole dev. Handles ~2,500 trucks across 9 carriers.
- CargoFinance – accounting & light-fintech tooling for a logistics back-office: invoicing, transfer tracking and bank-rail payouts (AP/AR, reconciliation). Sole dev.
- CargoETL – closed TMS; built and maintain both the Next.js dispatcher dashboard and the React Native [Expo] driver app – order flow, live tracking, documents and dispatch comms.

ALTEK DIGITAL

2022 – 2024

Frontend / Mobile Engineer · Remote – US logistics

First multi-year production project – a TMS for US logistics carriers and dispatchers (since wound down).

- Built the dispatcher dashboard and the driver mobile app: order flow, live tracking and dispatch comms.
- Worked across the Vue / Nuxt web stack and a React Native app shared by drivers in the field.
